

An aerial photograph of a massive, modern industrial facility. The building's roof is a light, neutral color and features the 'FIOOGET' logo in large, bold, black letters. Below the main logo, the tagline 'flooret forever' is visible in a smaller font. The building has a long, rectangular footprint with several large, dark-colored doors or loading docks along its side. In the background, there are green agricultural fields and a multi-story white residential or commercial building. The sky is clear and blue.

## Flooret Story

At Flooret, every surface tells a story of innovation and refined design. With advanced manufacturing, global aesthetics, and uncompromising durability, we craft premium large-format slabs for contemporary floors, walls, and countertops built with precision, simplicity, and quiet sophistication.

Where scale meets serenity,  
and surfaces become  
—architecture

Design begins with touch,  
and comes alive through choice.

# About Flooret

At Flooret, we believe every surface tells a story. Rooted in a commitment to excellence, innovation, and premium. We combine advanced manufacturing with refined, global design to offer premium slabs made for contemporary living. Built on precision, durability, and a clear design vision, Flooret delivers surfaces that elevate spaces with simplicity, scale, and quiet sophistication.

As specialists in large-format slabs, we bring together advanced manufacturing, refined aesthetics, and uncompromising durability to create premium surfaces for floors, walls, and countertops. Built on a legacy of craftsmanship and innovation,

Flooret is where material excellence meets modern design. craftsmanship, we craft tiles that transform spaces into experiences. Our journey began with a vision to redefine the standards of tile manufacturing in India and global markets.

By blending state-of-the-art technology with time-honored craftsmanship, we've developed a diverse range of large-format porcelain and ceramic tiles designed for both residential and commercial spaces. Each Flooret tile is a testament to our dedication to quality, durability, and modern design.

# Flooret Philosophy

To become the leading Indian brand that empowers architects and designers with surfaces that shape the future of built environments uniting scale, precision, and design integrity to redefine how spaces are imagined, crafted, and experienced.

We draw inspiration from everyday details the colours, textures, and forms that surround us. By reinterpreting these elements with intention, we create surfaces that bring a fresh aesthetic to contemporary spaces. Our goal is simple: to help shape environments where people feel comfortable, connected, and at ease, finding something of themselves reflected in the spaces they live and work in.

FLOORS

WALLS & FACADES

COUNTERTOPS  
& KITCHENTOPS

BATHROOM VANITYTOPS  
AND WALLS

ANY OUTDOOR OR  
INDOOR SPACE

Our products are engineered for modern construction demands, offering a balance of visual elegance, technical strength, and long-term performance.

# Product Identity

## Slabs & Sintered Stones

Flooret operates exclusively in the large-format category. Our portfolio focuses on slabs and sintered stone surfaces, with **the sizes above 1200x1800mm in multiple thickness options.** This ensures a consistent architectural-grade offering designed for premium, seamless, and large-scale applications.

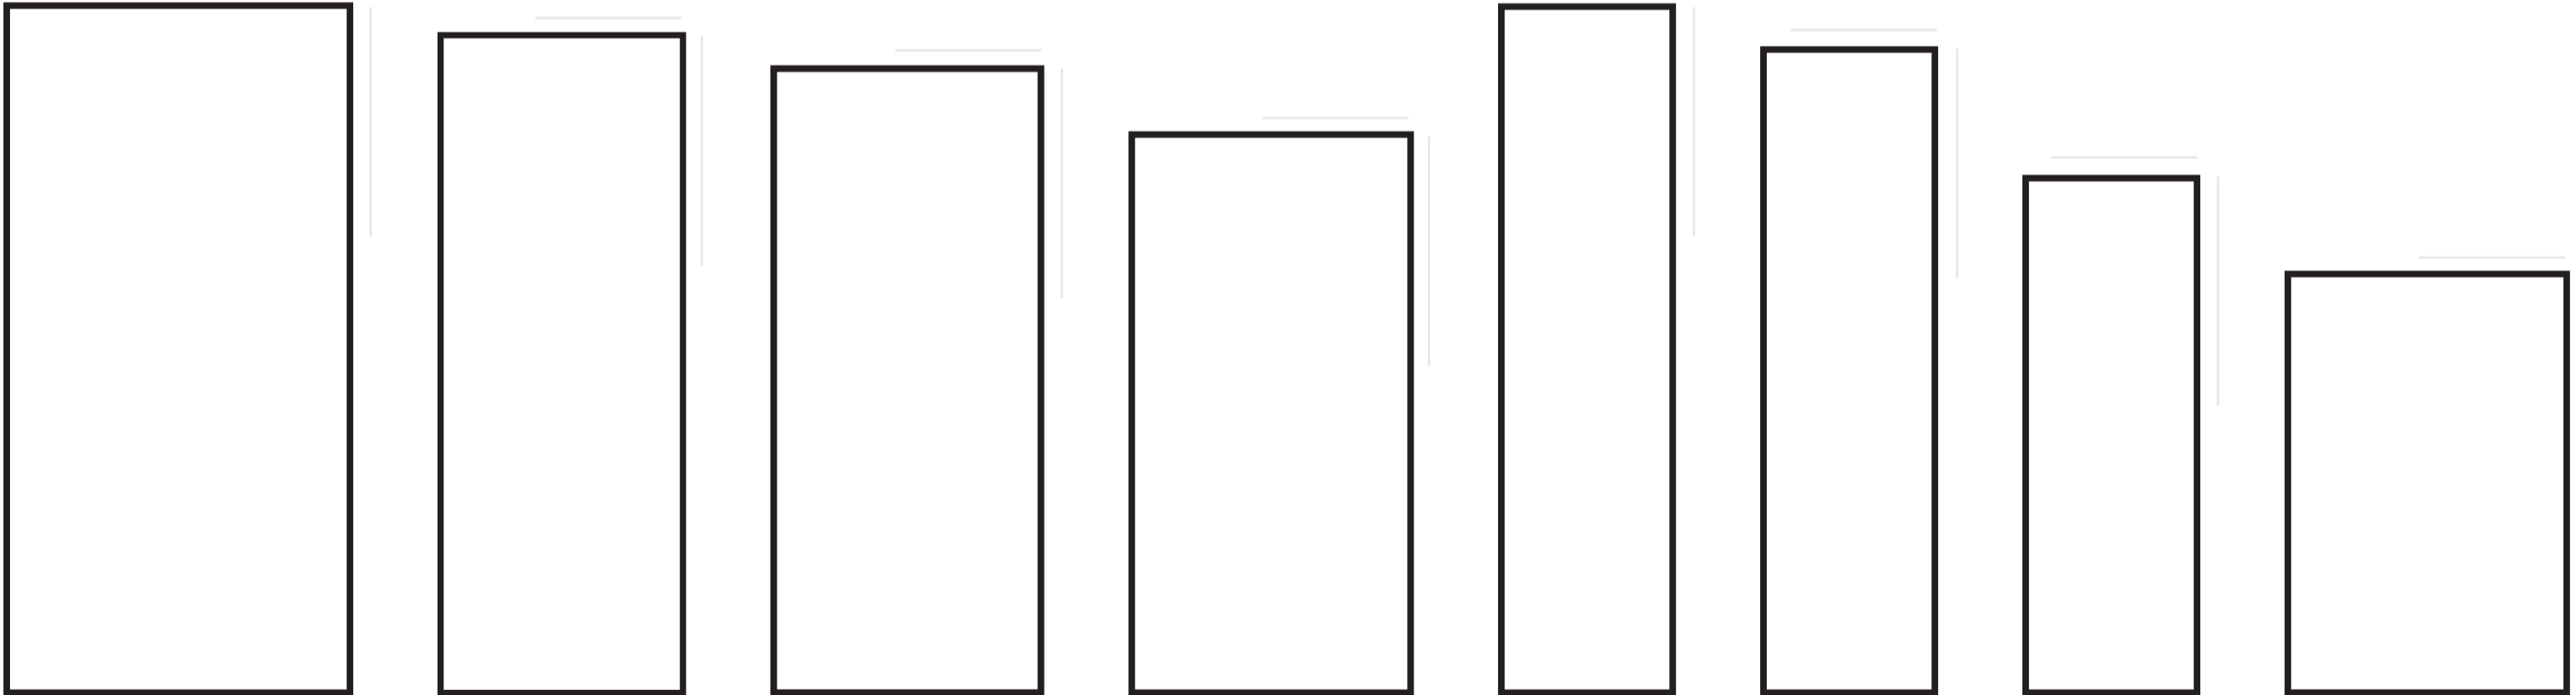

# Size Capability

Floret delivers a wide range of large-format slab dimensions, enabling designers and architects to work without creative limits:

LARGE-FORMAT SLABS FOR LIMITLESS *Architecture.*

- Starting formats from 1200X1800mm and above
- Extra-large architectural slabs for seamless wall and floor applications
- Custom size support for project-based and bulk architectural requirements
- Our size capability empowers minimal-joint designs, expansive visual continuity, and high-impact spatial aesthetics.

# Production Capability

Flooret is powered by high-capacity, technology-driven manufacturing infrastructure designed for precision and scale.

Sintered Stone Slab Capacity:  
**9000** slabs per day  
of 15 mm

High-volume  
**consistency**  
for **domestic** and **international**  
project supply

Porcelain Stoneware  
Ecosystem Support:  
**25,000**  
sqm per day of 9mm

Fully automated production and material  
handling systems

This manufacturing strength enables Flooret to support large commercial developments, export markets, and architectural projects with assured timelines and uniform quality.

# Technology & Manufacturing Excellence

Flooret operates with world-class Italian production technology, ensuring global performance standards at every stage of manufacturing.

## Core Technologies:

- SACMI Continua+ System
- System Lamgea Sintered Stone Lines
- Advanced Pressing, Drying & High-Temperature Kilns
- Automated Surface Finishing & Calibration Systems

## Key Advantages:

- Dimensional Accuracy & Flatness Control
- Zero-Defect Surface Engineering
- Consistent Batch-to-Batch Quality
- International Safety & Sustainability Compliance

# Design & Surface Innovation Approach

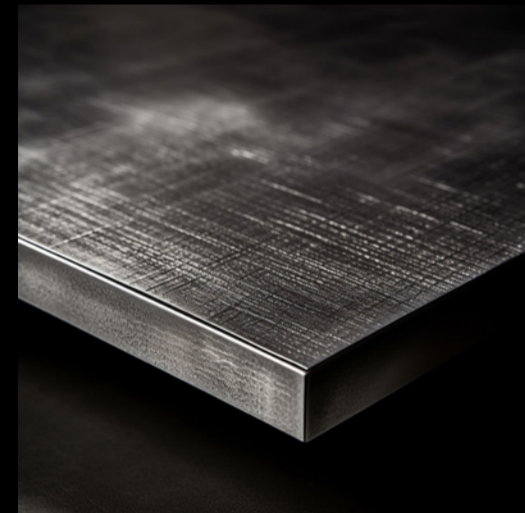

At Flooret, innovation begins at the concept stage and continues through execution.

## Global Design Research

We track international trends, architectural movements, and natural material evolution to develop slab surfaces inspired by stone, marble, concrete, metals, and contemporary textures.

## Material Engineering

Our sintered stone technology allows us to engineer surfaces with superior density, strength, and resistance without compromising on aesthetics.

## Surface Development

We create advanced finishes that enhance both visual depth and functional performance, including:

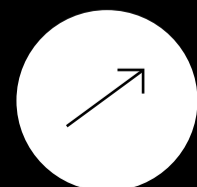

- Polished & High-Gloss Surfaces
- Soft Touch & Natural Matt Finishes
- Structured & Textured Architectural Effects

# Execution Power

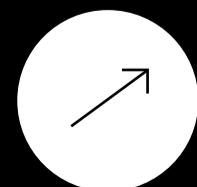

STRENGTH YOU CAN TRUST.  
*Beauty* YOU CAN SEE

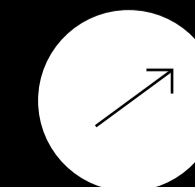

End-to-end in-house  
production control

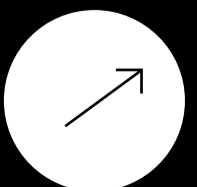

Advanced quality testing  
at every stage

Project-based supply  
support

Export-ready packaging  
and logistics systems

# Quality Assurance

Quality at Flooret is engineered, not inspected.

#1

In-process quality monitoring

#2

Advanced material and surface testing labs

#3

Final pre-shipment inspection protocols

#4

Compliance with international benchmarks

Every slab undergoes rigorous evaluation to ensure performance, finish consistency, and dimensional accuracy across global markets.

# Sustainability & Responsibility

Our goal is to create high-performance surfaces that deliver exceptional quality while minimizing environmental impact.

Flooret embeds sustainability across manufacturing and sourcing by using eco-friendly and recycled materials, conserving water, reducing waste, and operating with energy-efficient processes delivering high-performance surfaces with a lower environmental impact.

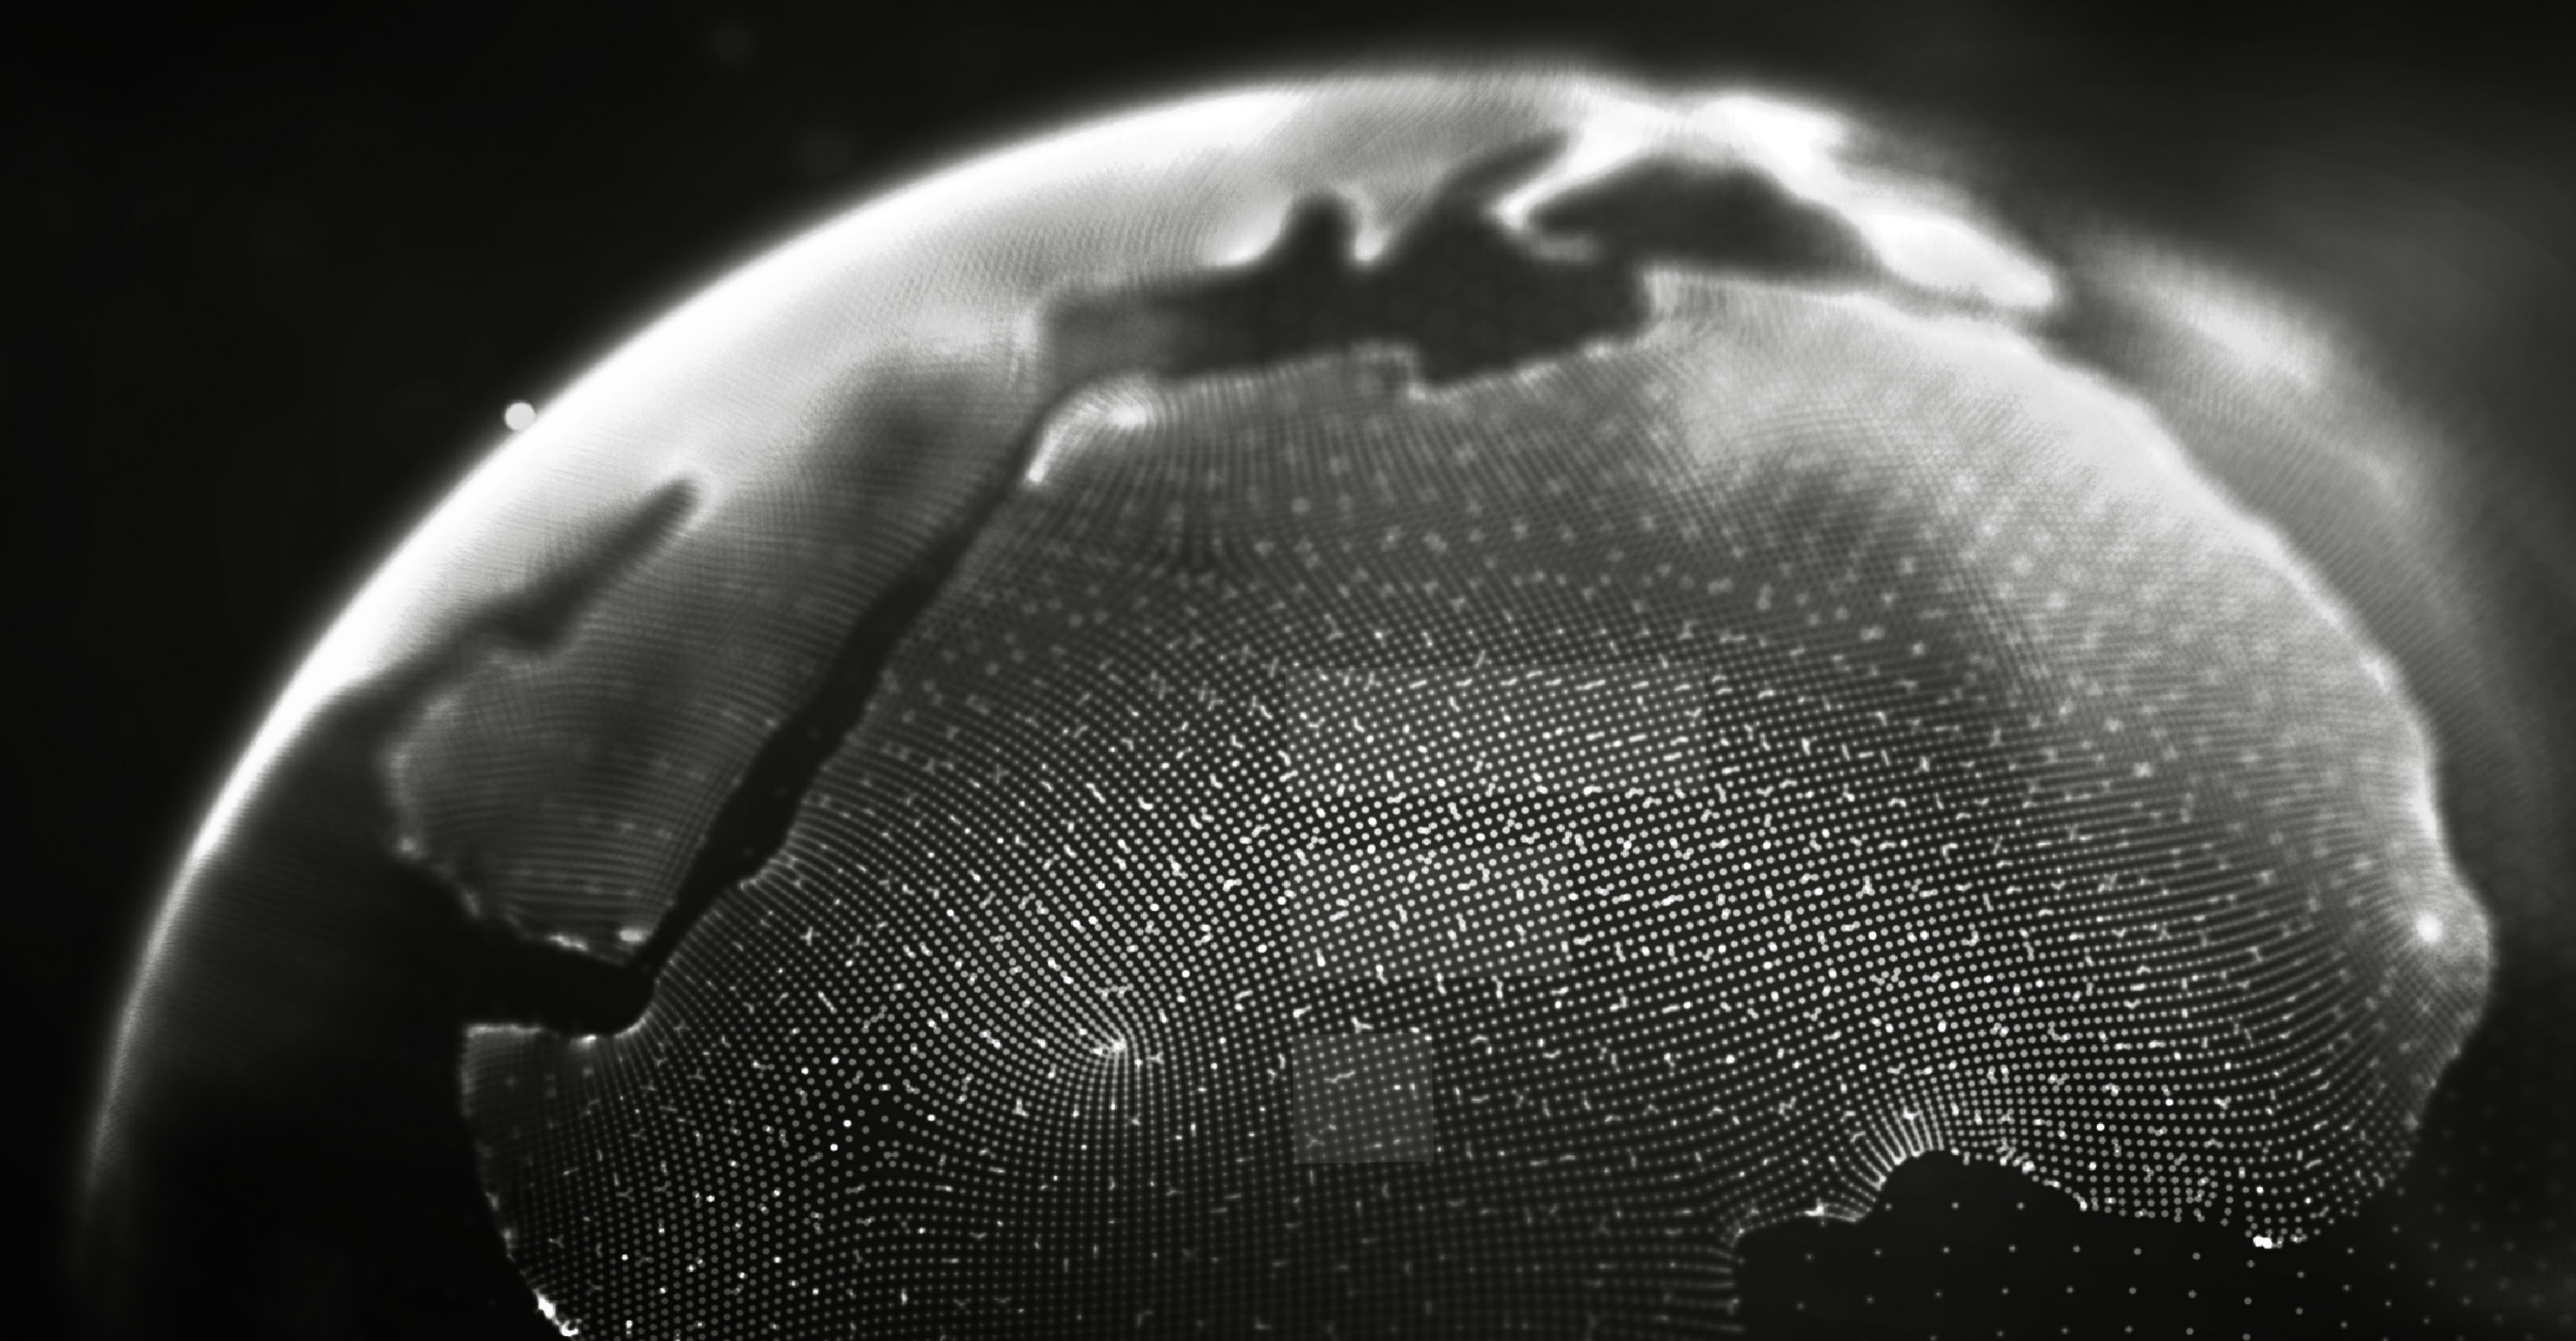

# Global Presencē

Floret is part of a global architectural surface ecosystem, serving clients across:

- > Europe
- > North America
- > South America
- > Asia
- > Africa
- > Oceania

With a presence in **71+ countries**, Floret supports architects, developers, and distributors worldwide.
